PROFESSIONAL PROFILE

MSc Management (Digitalisation and Big Data) candidate at the University of Bristol with a finance, international trade and business analytics background. Hands-on experience in SQL, Python, Excel and Power BI concepts, with portfolio projects covering large-scale data cleaning, analysis-ready tables, KPI-style reporting, applied research prototypes and business-facing recommendations. Interested in Data Analyst, BI Analyst, Business Analyst and Finance Data Analyst graduate roles in the UK.

EDUCATION

MSc Management (Digitalisation and Big Data) | University of Bristol | Bristol, UK | Sep 2025 - Sep 2026 (Expected)

- Focus: big data analytics, digital transformation, data-driven decision-making, Power BI reporting and research methods.

BSc International Trade and Economics (International Trade / Financial Risk Management) | Central University of Finance and Economics & Victoria University | Sep 2021 - Jul 2025

- GPA: 87.36/100 (3.7/4.0); Second Class Academic Scholarship in 2022 and 2023; relevant modules include Statistics, Econometrics and Accounting for Decision Making.

TECHNICAL SKILLS

SQL & Databases	joins, CTE-style logic, aggregations, subqueries, validation and ETL cleaning rules; MySQL, SQLite, DataGrip
Python Analytics	pandas, data profiling, missing/duplicate handling, extraction scripts, matplotlib and seaborn visualisation
Power BI	KPI cards, slicers, trend charts, Power Query cleaning, DAX-style measures and data modelling fundamentals
Excel & Reporting	PivotTables, lookup formulas, data-quality trackers, KPI summaries, reporting notes and stakeholder-ready analysis packs
Business Analysis	business-question framing, requirements translation, KPI design, stakeholder communication and insight storytelling

EXPERIENCE

Data Analysis Intern | Licheng Holdings Group, Data Asset Division | Jan 2025 - Feb 2025

- Benchmarked Minitab, SPSS and SAS-style statistical workflows to support DMS feature research, interface decomposition and requirement discussion.
- Supported early-stage DMS platform testing and documentation, focusing on data preprocessing, structured management, statistical output interpretation and permissions/governance workflows.
- Contributed to workflow analysis for a DeepSeek-enabled reporting/explanation module, with the project targeting a 40% improvement in report generation speed and estimating a 20% reduction in repetitive chart-explanation work.
- Observed DeepSeek deployment and integration discussions while supporting research notes, test-case preparation and cross-functional communication across product, operations and business teams.

Sales Intern | Aerospace Information (Shandong) Technology Co., Ltd | Jul 2021 - Aug 2021

- Recovered RMB 100,000+ in subscription/service receivables within one month and built an Excel tracker covering 4,000+ customer records, improving call-to-payment conversion by 4-5 percentage points.

SELECTED DATA & APPLIED PROJECTS

UK Retail Transactions ETL, SQL Analysis & BI Reporting Project | Independent Project | 2025

- Cleaned and validated 524,878 analysis-ready transactions from approximately 1.6M UK retail records, using SQL rules to remove duplicates, invalid stock codes, missing descriptions and non-positive quantity/unit-price records.
- Automated MySQL-to-Python extraction, analysed GBP 10.6m+ sales value with pandas/matplotlib, and structured KPI-ready narratives around monthly revenue, top products and revenue contribution.

Apple App Store SQL & Python Analysis Project | Independent Project | 2026

- Cleaned and analysed a 1.23M-record Apple App Store dataset using SQL and Python, building issue flags for missing values, date validity, price logic and app-size anomalies.
- Analysed category mix, pricing models, developer performance and update trends; created summary tables and visualisations with pandas, matplotlib and seaborn.

AEP Workplace Wellbeing Questionnaire Prototype | Applied Research / Web Prototype | 2026

- Translated wellbeing and student-to-work transition research into a structured questionnaire prototype covering job-search pressure, belonging, accessibility and career-readiness support.
- Built a public-safe GitHub Pages preview and portfolio case-study assets to make the survey flow reviewable while avoiding private supervisor notes or internal proposal content.

Selected GitHub Tools & Web Projects | Independent Projects | 2026

- Built a bilingual React/TypeScript/Vite portfolio website and explored Next.js, Supabase Auth/Postgres, protected routes, local-first storage and Vercel deployment through small productivity/training-tracker tools.

AWARDS & ADDITIONAL INFORMATION

- Outstanding Graduate, Central University of Finance and Economics (2025); First Prize, China National Undergraduate Innovation, Creativity and Entrepreneurship Challenge, University Level (2023); Second Prize, CMAU, University Level (2023).
- Languages: Chinese (native), English (fluent). Right-to-work evidence available through the official UK share code process when required.
